

Discussion items

- **Upgrade to 4MW in the future**
Accelerator, Facility, Experiment(near detector)
- **50GeV abort line**
- **Target and Horn design**
- **Superconducting beam transfer line**
The answer is “it is OK”
- **Near detector options**
280m-0°, 280m-fine, 2km-fine, 2km-water
- **Far detector reconstruction (& upgrade)**
“we strongly support the reconstruction!”
- **Budget request of the neutrino line**
budget items and schedule
making a case for immediate and full funding
- **Collaboration and proposal**
schedule and procedure
foreign interests and possible “in kind” contributions
- **Near detector physics**
 $\sin^2\theta_W$, Δs , (LSND)
- **What are the critical R&D items?**
(Should not exist.)
